It can be assumed that all vacancies advertised in CHEMISTRY IN BRITAIN for employment in the United Kingdom are open to male and female applicants equally and conform to relevant UK laws and the British Code of Advertising Practice unless accompanied by a printed statement explaining why an individual advertisement is excepted from such laws and/or Code. While the Publishers of CHEMISTRY IN BRITAIN take all reasonable care to ensure that advertisements therein conform to UK laws and the British Code of Advertising Practice they are not responsible for any claims made by individual advertisers in published advertisements. Where an individual advertisement is thought to be in breach of relevant laws or codes of practice readers are invited to communicate with the Advertisement Manager.

Restrictions on the transfer of currency from some overseas countries to the United Kingdom are sometimes more severe. Careful enquiries should be made about the detailed arrangements for returning money to Britain after it has been earned and banked in another country.
